

1. Any type of Form (Example-Registration form) validation. After Validation store information in a file system.

2. Create a program by which you can add student info in a file using php.

Name	Subject	Mark
Akash	Phy	5
Babul	Phy	10
Rity	Phy	8
Akash	Math	12
Babul	Math	6
Rity	Math	14
Akash	Che	9
Babul	Che	7
Rity	Che	8

- You can write/add a new data in file
- Read/ Display all students marks
- You can search a specific student all info

Search: Rity

Output:

Rity Phy 8

Rity Math 14

Rity Che 8
